

MELTING FURNACES FOR SCRAP CONTAMINATED METAL

SIDE-WELL SCRAP MELTING FURNACE WITH HIGH MELT RATE AND LOW ENERGY CONSUMPTION

- 55 ton capacity
- Castable refractory construction
- Metal recirculating pump
- Energy recovery system
- Ultra-low NO_x combustion system
- Chimney with by-pass system for salt fluxing
- Radio controlled door operation
- Mechanized tap plug control device
- Operator-friendly design with multi-level control capabilities
- Pollution controls incorporating incinerator and dust collector

Innovative engineering capabilities and process knowledge make GNA alutech a superior quality supplier of casthouse furnaces and equipment for primary and secondary producers.
